EDUCATION

University of Constantine 2 <i>Master's in Software Engineering & Intelligent Systems</i>	2025 – Present Constantine, Algeria
University of Constantine 2 <i>Bachelor's in Software Engineering</i>	Jun 2025 Constantine, Algeria

LANGUAGES

Arabic: Native, **English:** Fluent, **French:** Intermediate

EXPERIENCE

Software Engineering Intern <i>SETRAM</i>	Mar 2026 – May 2026 Constantine, Algeria
- Deployed a document traceability platform in a finance department office, reducing workload by 85%, eliminating manual checks entirely, and cutting information search time by 75%. - Authored a report proposing a software migration/update plan, a risk mitigation strategy, and a PCC automation tool proposal.	
AI Research Intern <i>CRBt – Center of Biotechnology Research</i>	Nov 2025 Constantine, Algeria
Built a two-stage Vision Transformer pipeline to detect and classify white blood cells into 18 classes, achieving up to 98% accuracy on select classes.	
Android Developer Intern <i>Maduo Studio</i>	Jan 2024 – Aug 2024 Dubai, UAE
- Designed Android UI/UX with Kotlin and Jetpack Compose for a fitness app. - Built a juice customization feature enabling users to select ingredients prepared by the gym's restaurant.	
Robotics Teacher & Coach <i>AljazarieROBOTICS</i>	Jun 2024 – Jun 2026 Constantine, Algeria
- Delivered Python and robotics training to youth participants. - Organized and mentored national teams for Codeavour Algeria and led Algeria's delegation to I-Fest Tunisia 2026. - Supported AI/programming initiatives with the Ministry of Youth and Sport for their staff.	
Developer Member <i>Google Developers Group</i>	Jan 2024 – Jun 2025 Constantine, Algeria
Developed and reviewed web authentication features; contributed to local developer training events.	
Hackathon Mentor <i>DevFest Constantine</i>	Nov 2023 Constantine, Algeria
- Mentored 7–9 teams (28–35 participants) in fintech app design during the DevFest Hackathon. - Handled technical setup, guidance and support to participants and event logistics.	
Contributor <i>Mozilla Campus Club</i>	Feb 2023 – Sep 2023 Constantine, Algeria
Worked on Android, AI/ML, and Networking initiatives. Supported content creation and team collaboration.	

SELECTED PROJECTS

Multi-platform Car Marketplace (React Native) <i>Designed, built, and deployed a multiplatforms production React Native car marketplace connecting Algerian customers with Chinese suppliers, now used by a real client.</i>
Grep Clone – Custom Regex Engine (Java) <i>Reimplemented grep from scratch, including a custom recursive-descent regex engine (quantifiers, groups, alternation, back-references) built without Java's built-in regex library.</i>
Git Clone – Version Control Internals (C++) <i>Currently building a from-scratch, dependency-free reimplement of core Git internals in C++.</i>
Python Automation Tool <i>Automated downloading and organizing of 116 files from structured web archives using Selenium. Resolved race conditions and validated file completion integrity.</i>

ACHIEVEMENTS

Coached winning team to 2nd Place track 02 – Codeavour Qatar (Junior Division), 2025
Directed Codeavour Algeria 2026 national operations
Mentored 2 of 5 winning teams (Track 1) – Codeavour Jakarta (Global Finals), 2026
Completed the Skyscanner Software Engineering Job Simulation (Forage)
Taught 40+ students and mentored 100+ across national robotics and AI workshops

TECHNICAL SKILLS

Languages: Python, Java, Kotlin, JavaScript, C++, HTML/CSS, SQL, Bash.
Frameworks/Tools: Spring Boot, React, Django, Ktor, FastAPI, JavaFX, Selenium, Jetpack Compose, PostgreSQL, MySQL, Docker, Git, Linux, Hibernate, JPA, Figma, L^AT_EX, Vim, JUnit, PyUnit, GitHub.
Concepts: REST APIs, OOP, Concurrency programming, Data Structures & Algorithms, Networking, UML, Agile method, PEP8, Code Maintainability.
